

Table 3. Model of Earnings Attainment for Typesetters and Compositors, Experienced Civilian Labor Force, by Sex, 1980<sup>a</sup>

<u>Variable<sup>b</sup></u>	<u>Men</u>		<u>Women</u>
<u>Unstandardized Coefficients</u>			
Age	32.3*		61.1*
<u>Marital Status</u>			
Formerly married	-1703*	**	345
Never married	-4373*	**	-108
<u>Region</u>			
North Central	48.1		-215
South	-1943*	**	-726*
West	-1678*	**	406
<u>Education</u>			
Less than 12 years of school completed	-1052*		-219
At least some college completed	-301		34.6
Hours worked per year	5.65*	**	4.85*
<u>Class of Worker</u>			
Government	4245*	**	1316*
Self employed	-518		-4.07
Unpaid family worker	-9693*		-10719*
<u>Industry Sector</u>			
Printing, publishing, and allied industries, except newspapers	486		1131*
All other industries	-613	**	932*
Intercept	5403*		-2511*
R <sup>2</sup>	.277		.454
<u>Standardized coefficients<sup>c</sup></u>			
Age	.055*		.142*
Hours worked per year	.392*		.607*

\*p < .05

\*\*Coefficients differ significantly by sex (p < .05).

<sup>a</sup>Sample includes only those who worked in 1979 and who were at work during the reference week.

<sup>b</sup>Reference categories for dummy variables are: marital status (currently married), region (Northeast), education (12 years of school completed), class of worker (private wage and salary work), industry (newspapers).

<sup>c</sup>Standardized coefficients for dummy variables not included.
